RESPONDERS' COMMENTS FOR FW 444 001 (SS21)							
Question 26: Do you have any comments or suggestions for organi	zing the cou	ırse?					
Great course instruction, loved the use of occasional dad							
He is a phenomenal instructor!							
I have no comments.							
I loved how this course was organized. It was nice being							
able to work through the lecture at whatever pace I wante	l k						
and have a good discussion during class. Ian was a thrill to							
work with and I wish I could have taken more classes with							
I loved this class and Ian so much. I usually would have							
been dreading having to wake up at 8am to go to class but							
was actually excited for this class every Thursday and							
learned something every class. He kept my attention for							
the whole class which is hard to do. I loved the entire set							
up of the class. Having a reading and/or video to watch and							
then questions on Tuesdays and then a meeting on							
Thursday was a great set up. Honestly, one of my favorite							
I really enjoyed this class. It was something that I really did							
not know about before this class and I was happy to look at							
conservation from different perspectives. Also this note is							
not about the class, but I don't think it is appropriate for							
the SIRS to ask for my sex. If you would like more							
demographic info, asking for gender and providing several							
I really liked this course and I found it to really make me							
think a lot more about conservation and what that means.							
would have liked if we switched up the groups that we met							
with each Thursday to hear some different points of view							
on the topics we discussed but besides that I found this							
class to be really enjoyable. I only wish I would have been							
I think that it would have been nice to have less discussion			·		_	_	_
time and more focus on conservation topics.							 

I think this class was really well organized. The consistency				
of assignments becoming available and their due dates				
made it really easy to stay on top of stuff and avoid late				
I thoroughly enjoyed this class and learned a lot.				
I would like it if there was more time for the exams				
because I was rushing to get it done				
love how this class was taught				
Loved this class				
no				
None				
nope				
Personally I would prefer an in person lecture instead of				
doing the lecture before class and coming to class to talk				
about it. It makes the required zoom time seem less				
important than other courses with more material given				
Professor McCullough is the best professor I have had. He is				
a great teacher who cares about his students and their				
learning experience. He designed this course perfectly, and				
did really well with the online format. I have told him on				
zoom, but will state it here too, this has been my favorite				
course this semester. One aspect I truly appreciate in this				
course is we do not have "busy work" but solely work that				
helps our learning of the subject. I would recommend this				
The organization of this class was very helpful. Having a				
consistent schedule made this class much easier on me.				

The setup of the discussions and lectures was overall easy					
to follow and made the course easily accessible and					
informational. The assignments were occasionally difficult					
to follow however as instructions may be too dense or too					
lacking to develop an ease of understanding of what needs					
to be done. I've found in previous courses that allowing					
students to converse with each other and between groups					
in an editing experience can help to better standardize the					
methods in which assignments are completed and limit					
mistakes. Implementing this practice for part of a					
This class has made me feel more prepared for a career in					
conservation					
This course was fantastic, and the professor did an					
excellent job setting it in the online format. I feel like this is					
the only class that I genuinely learned from this year, and I					
was inspired by the material we read.					
This course was very well taught and helped me learn and					
grow so much. I loved group discussion as well as lectures					
and the project was a good way to practice what we were					
taught and what we will need to do in the future. This was					
one of the best professors I have ever had with enthusiasm					
When we would meet with the instructor he would give			_		_
good constructive feedback, however, his written feedback					
was quite harsh. It was like he was taking out his					
frustrations through aggressive feedback comments.
